SEE IT. HEAR IT. EXPERIENCE IT.

COMPANY PROFILE · 2026

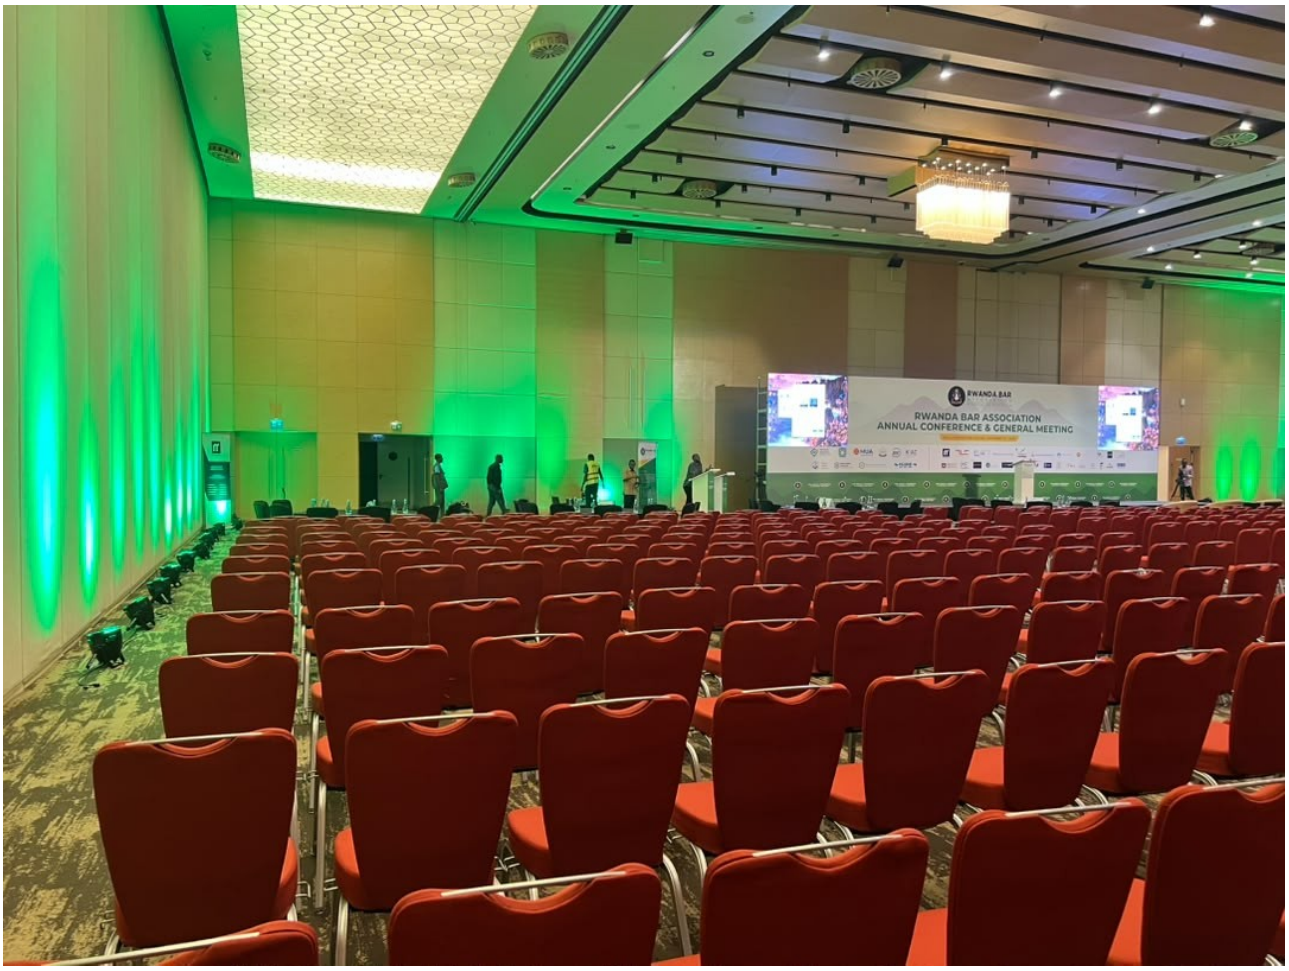

AUVIS STUDIO Ltd.

AUDIOVISUAL PRODUCTION · LIVE EXPERIENCES · EVENT TECHNOLOGY

We create the environment through which people see, hear, understand and remember a moment.

AUVIS STUDIO Ltd. is an audiovisual production and live-experience company delivering integrated creative, technical and production solutions for events, organisations, brands and institutions. From first concept to final frame, we bring together video production, photography, livestreaming, sound, interpretation, LED screens, lighting, stage production and event branding into one accountable production partner.

Rwanda Bar Association — Annual Conference & General Meeting

Who We Are

AUVIS STUDIO Ltd. operates at the intersection of creative production, audiovisual technology and live experiences. We work with organisations that need their events, messages, brands and stories delivered with clarity, technical precision and visual excellence.

Whether it's a high-level conference, international summit, corporate event, product launch, hybrid meeting, public forum, concert, institutional programme or documentary production — AUVIS brings the creative and technical disciplines together under one production partner.

Understand the vision. Build the experience. Deliver the moment.

Our Belief

An event can carry an important message and still lose its impact if people can't hear the speaker, see the presentation, follow the interpretation, feel the atmosphere, or engage with the event remotely. A powerful story can also lose its value when it is poorly captured. AUVIS exists to solve that problem.

We combine people, creativity, technology and production discipline to make sure important moments aren't only delivered — they're experienced. Every camera angle, microphone, light, screen and graphic decision shapes how an audience feels a moment.

We don't simply make events work. We make them matter.

Our Vision

To become one of Africa's most trusted audiovisual and live-experience production companies — giving African events, brands and institutions access to world-class production, creative storytelling and event technology, delivered with local expertise and international standards.

Our Mission

To transform ideas, events and messages into exceptional audiovisual experiences — bringing together creative talent, production expertise and technology to deliver reliable, memorable, high-impact experiences for our clients and their audiences.

① **CREATE**
Develop compelling visual & experiential solutions

② **CONNECT**
Help organisations reach their audiences

③ **DELIVER**
Execute with technical precision & professionalism

④ **EXTEND**
Turn live moments into content that keeps working

What We Do

AUVIS is built as an integrated audiovisual production house. Every assignment — from a single camera to a full multi-camera livestream, from a conference microphone to a complete interpretation system — is approached with the same production discipline, organised across six core areas.

01 — VISUAL PRODUCTION

We capture stories, people, events and brands through professional visual production.

- Corporate & documentary video
- Event & conference coverage
- Commercials & promos
- Interviews & testimonials
- Social media video content
- Institutional & brand films
- Multi-camera production
- Editing & motion graphics
- Same-day rapid turnaround

We create visual assets that let the moment live beyond the event.

02 — PHOTOGRAPHY

Professional photography that captures the people, details and defining moments behind every production.

- Corporate & event photography
- Conference & institutional photography
- Executive & portrait photography
- Product & brand photography
- Documentary photography
- Real-time event photography
- Social media photography
- Photo editing & delivery

Images built for media, reports, websites, campaigns and institutional communications.

03 — LIVESTREAMING & HYBRID EVENTS

The audience shouldn't be limited by the walls of the venue. We connect physical and remote audiences with professional livestream and hybrid production.

- Multi-camera livestreaming
- Corporate & conference livestreams
- Hybrid & virtual events
- Webinar production
- Multi-platform streaming
- Live switching & graphics
- Remote speaker integration
- Recording & archival

Built around the audience — whether in the room, online, or both.

National Dissemination of LARS 2025 Findings — Ministry of Education

04 — SOUND, INTERPRETATION & CONFERENCE TECH

Clear communication is the foundation of every successful event, from intimate executive sessions to large international conferences.

- — Professional sound & PA systems
- — Wireless microphones & mixing
- — Stage monitoring
- — Digital conference systems
- — Simultaneous interpretation
- — Interpreter consoles & headsets
- — Multilingual conference solutions
- — Audio recording & support

Every participant can hear, understand and participate.

Wireless mic & signal management

Amplifier & power rack

05 — LED, LIGHTING & VISUAL TECHNOLOGY

The visual environment defines how an audience experiences an event. We transform venues into immersive, professional spaces.

- Indoor & outdoor LED screens
- LED stage displays & video walls
- Presentation screens & confidence monitors
- Stage & architectural lighting
- Decorative & intelligent lighting
- Follow spots & lighting control
- Content playback & technical operation

We use technology to shape attention, atmosphere and experience.

06 — STAGE, BRANDING & EVENT ENVIRONMENTS

Before an audience hears the first word, they see the environment. We bring a brand's identity into the room.

- Stage design, setup & backdrops
- LED-integrated stage environments
- Podium, event & conference branding
- Directional signage & roll-up banners
- Photo backdrops & sponsor walls
- Exhibition branding
- Venue transformation

Spaces that feel intentional, coherent and aligned with the client's identity.

The AUVIS Production System

One vision. One production. One team.

AUVIS is designed to remove the fragmentation that usually comes with event production. Instead of managing separate suppliers for sound, screens, livestreaming, photography, video, lighting and branding, clients work with one integrated production partner across five stages:

01
DISCOVER
Understand the event, audience & objectives

02
DESIGN
Translate the brief into a technical plan

03
BUILD
Install, configure & test before doors open

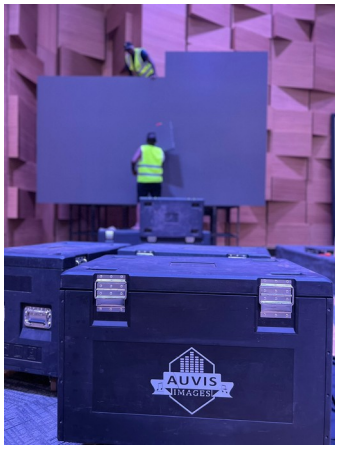

04
EXECUTE
Deliver the experience live, in real time

05
CAPTURE & EXTEND
Turn the event into content that keeps working

ONE BRIEF → ONE PRODUCTION SYSTEM → ONE ACCOUNTABLE PARTNER → MULTIPLE AUDIENCE EXPERIENCES

On-site LED wall build — no last-minute improvisation

Our crew, testing before the audience arrives

The AUVIS Live Experience Model

An event is more than what happens on stage. We approach every production as a complete audience experience, built across five connected layers:

SEE
Visuals
LED, stage design, branding, lighting

HEAR
Audio
Sound, mics, interpretation

WATCH
Content
Cameras, video, livestream

EXPERIENCE
Atmosphere
Stage, journey, execution

REMEMBER
Legacy
Photography, highlights, recap content

SEE. HEAR. WATCH. EXPERIENCE. REMEMBER.

Rwanda Bar Association Annual Conference — full production build

Our Creative Production Approach

From moment to memory.

Every event contains stories — a speaker's message, a handshake, a breakthrough, a celebration, a defining announcement. Our job is to find those moments and turn them into visual assets that keep communicating long after the event ends.

STORYTELLING + PRODUCTION + TECHNOLOGY + DISTRIBUTION

We ask what the audience should experience, what they should remember, what they should share, and what content should keep working after the event — so one production generates multiple communication assets while staying consistent in quality, message and visual identity.

Our Core Capabilities

Video	Multi-camera production, interviews, corporate & event films, post-production
Photography	Event, corporate, institutional & documentary photography
Live Production	Vision mixing, camera direction, graphics, presentation management

Livestreaming	Reliable multi-camera broadcasts & hybrid event production
Audio	Sound reinforcement, microphones, mixing & monitoring
Interpretation	Multilingual conference & simultaneous interpretation technology
LED & Displays	Screens, presentation displays, confidence monitors, content systems
Lighting	Stage, architectural & event lighting design
Stage	Design, construction, setup & visual integration
Branding	Physical event branding & environmental visual communication

LET'S CREATE SOMETHING WORTH REMEMBERING

One brief. One production system. One accountable partner.
